

## Who we are

Jazz-Media is a design company founded in 2002 by a group of individuals looking to provide a balanced mix of both products and services, as opposed to just the product alone.

Jazz-Media has a staff of experienced and knowledgeable professionals that encompass skills ranging from web site design and programming, search engine optimization, graphic design, application development and more. Primarily based in Grande Prairie, Alberta, we work with clients all over Western Canada, as well as with affiliates throughout Alberta.

We are dedicated to meeting the goals and objectives of every client and this focus has given us great success with our endeavors. We are proud of our outstanding customer service that has directly resulted in ongoing customer loyalty. In turn, we continuously strive to develop strategies that will allow us to better serve our customers.

Jazz-Media continuously communicates with our clients, learning about every aspect of their business to ensure the right products and services are provided to meet and exceed their goals. We are focused on creating meaningful and positive relationships with every client and look forward to creating a partnership with you!
